

FloraRez™ PR

Description:

FloraRez PR is gum rosin that has been partially hydrogenated. It is a pale-colored resin that has excellent thermal and oxidative stability characteristics due to the hydrogenation process.

Compared to other gum and wood rosins, FloraRez PR offers a higher degree of color and solubility stability for its derivative products produced.

Applications for FloraRez PR include tackifiers and sealants, inks, coatings and lacquers, electronic solder fluxes and pastes, paper size modifiers, and personal care products.

Sales Specifications:

Abietic Acid, %	2.00 Maximum
Acid Number, mg KOH/g	164 Minimum
Color, USRG scale	X Maximum
Softening Point, R&B, °C	76 Minimum

Packaging, Storage and Handling:

FloraRez PR is packaged in 225 kg metal drums or 25 kg bags. Store in cool, ventilated, dry building. Re-certify quality after 24 months from date of manufacture in original, unopened packaging. Product manufactured to Florachem specifications in China.
